

## COVER LETTER

***Respectable Sir / Madam,***

I have 5 years experience in teaching field. Currently, I am teaching in “Islamabad Model College for Women, I-8/3” as a Math Teacher. And I am also looking for the best option in the future, and if I got a chance in future for working in your institute it would be a great platform for me.

After completing my Master in **Mathematics** in 2013, I started teaching and in 2018 I also completed my M.Ed. while continuing my job. Teaching is my passion and I have good hands on my subject. My Master Degree in Mathematics and hands-on teaching experience combined with my M. Ed. makes me the best choice for my subject.

I am certain in my capability to provide high standards of teaching services. I know just how to make my subject interesting by using contemporary resources and materials that will keep student’s interest piqued at all times.

As an enthusiastic and experienced Math Teacher, I am positive in my capabilities to make a substantial contribution to the Mathematics Department of any good Institution. I assure that if you will provide me a chance I will definitely try to meet your expectation because I am a competent teacher along with skills and subject expertise.

I would be highly obliged if you consider me eligible and shall be looking for a positive response.

***(I will be available for an online interview and on my contact no and e-mail also.)***

Thanking you I remain.

***Saba Anwar (M. Sc. Math. B. Ed. M.Ed.)***
